

Education

Under the leadership of **Dr. Michele Rehbein**, a Certified Ecologist through the Ecological Society of America with a Master of Science in Biology and a PhD in Environmental Science, our education program is not only well-rounded but also highly adaptive. We can tailor our program to meet your specific educational needs.

Our curriculum follows the **K-12 Utah SEEd** guidelines and standards, and with enough time in advance, we can customize our lesson plans to meet specific themes of your classroom's curriculum.

Hours of Operations

Monday - Friday

7:00 AM - 3:30 PM

2215 North 2200 West
Salt Lake City, UT 84116

They may bite, but we don't!

Salt Lake City Mosquito Abatement District's Education Programs

About Us

The Salt Lake City Mosquito Abatement District monitors adult mosquito populations throughout the city using various trapping devices and tests the captured mosquitoes for several diseases.

We are educators as well as scientists.
